

Transformation of the Defense Industrial Base: A Roadmap

	<u>Recommendations</u>	<u>Status</u>
1	The Department should view the industrial base as being notionally composed of five operational effects-based sectors.	The Joint Staff has adopted five functional architectures defining operational effects-based sectors: “the new vernacular.”
2	The Department should organize its decision-making processes to optimize operational effects not programs, platforms, or systems.	Update to CJCSI 3170.01 and DoD 5000 series introduce new requirements decision-making process and use of architectures in acquisition process.
3	DoD ought to analyze the results of a systematic assessment of critical technology requirements in each of these sectors.	ODUSD(IP) conducting Defense Industrial Base Capabilities Studies for each sector beginning with Battlespace Awareness. All initial studies complete in 2005.
