AEFI Events

The New Technology Base as a Decisive Weapon and Engine for Transformation:
Leveraging the Global Adaptive Technology Value Stream for Defense and Aerospace in the Network-Centric Era

This is a conference on methods and technologies to deliver on-demand, dynamically customizable connectivity for a transformed industrial base. The program addresses adaptive enterprises across supply chains and explores partnering models to speed time-to-deployment of hardware, software, and systems.

March 10 –12
Renaissance Vinoy Resort
St. Petersburg, FL
