

# Air Force Research Laboratory

*Munitions Directorate*

## Air Force Fuze Technology Overview

**Timothy Tobik**  
**Chief, Fuzes Branch**  
**Munitions Directorate**  
**Air Force Research Laboratory**

# Historical Perspective Munition Evolution / Revolution

Munitions Directorate

# Air Force Research Laboratory's Challenge

*Munitions Directorate*

- What is Our Product in The Directorate?
  - Knowledge!
- How do we Transfer Knowledge?
  - Transformed into New Capability
  - Delivered In the Form of Technology
- How Do We Transfer Knowledge Into Capability?
  - Show Evidence of Learning in Being Able to Deliver A Capability to Various Specifications of Performance

Captured in: Analysis,  
Experiments,  
Demos, Breadboards,  
Brassboards....

Book: Third Generation R&D, Philip A. Rousell, Kamal N. Saad, Tamara J. Erickson, Harvard Business School Press, 1991 (Arthur D. Little Inc., Copy rights)

Book: Fourth Generation R&D, William L. Miller, Langdon Morris, Copyright 1999, Published by John Wiley & Son, Inc.

# Areas for Innovative Management of Fuzing

*Munitions Directorate*

- **Sustainment/Stockpile Management**
  - Aging stockpile...reduced/declining reliability
    - Requires Replenishment
- **Legacy Systems Will Continue to Require Fuzes as A Commodity**
  - P3I or New Fuze
- **Future System Trends Toward Integrated Distributed Fuze Systems Within Weapon/Program**
  - Integral, Distributed, ESAD-Based, Miniature, Agile, Programmable, More Reliable, “Smart”, Cheap ...

# Fuze Technology Base Issues

*Munitions Directorate*

- **Maintain Expertise and Facilities to Support New Technology Research in Fuzing—Balanced Posture**
- **Require the ability to Resolve Development and Production Problems**
- **Enhance Enabling Fuze Technologies For Timely Insertion**
- **Recognition Regarding Sophistication and Complexity---- Often an after/last Thought**
- **Service Investment--- Specific Near Term Needs**
- **Industry Relies Heavily on DoD for for Long Term S&T Investment---- Near Term Stakeholders; No Incentive**

**Lack of S&T Investments and Planning By Industry and Government= Inability to Realize Current requirements and Future Capabilities**

# Fuze Sub-Core Focus Areas

## “Adaptable Fuzing for Focused Lethality”

Munitions Directorate

### Point Burst Technology

Projected trajectory

Raised (or ground) contour

Height-of-Burst (HOB)

Radar based ground contour

### Penetration Fuzing Technology

Initiation Sequence

Advanced Initiation

### Battle Damage Sensing Technology

•TMD based mini-penetrators delivered with ground stations

collateral release defeat node  
ground relay stations convey information to warfighters

dedicated sensor nodes

chem/bio defeat warhead node  
conventional warhead node

#### Wireless Intra-Weapon Communication

Time (seconds)

### Fuze Experimentation

# FAST- A Precision HOB, Low Cost Ground Profiling Radar

*Munitions Directorate*

## Common Fuze Sensor for a Broad Spectrum of Weapons

Pulse Doppler Radar Using Low Cost COTS Components

Nose and Tail Mount Configurations Only Differ in the Antenna Structure

Small Volume Common Design Provides Identical Requirements for Any Weapon

- **Advanced Development**
- **Contractor: Mustang**

**Nose-Mounted  
Configuration  
(DSU-33 Form Factor)**

**Tail-Mounted  
Configuration  
(MK-82 Demo)**

**100% Common Low Cost Electronics and Operational Software**

# Flight Tests

Munitions Directorate

Nickname 050127\_W\_CAL

Nickname

# Focused Ordnance Controller with Aimpoint Selection (FOCAS) Program Objectives

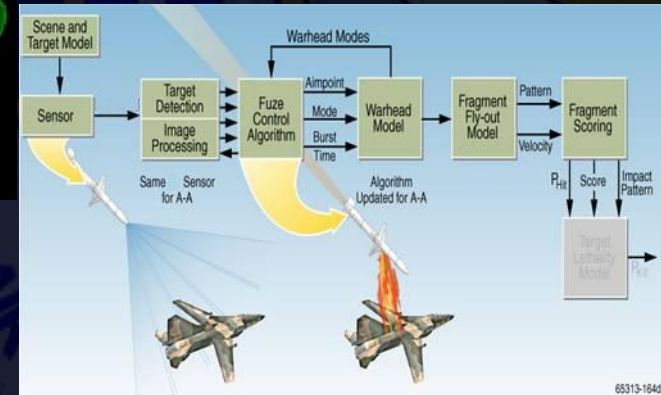

Munitions Directorate

- Exploratory Development
- Contractor: General Dynamics

## Objectives:

- Develop the next-generation active imaging fuze sensor to enable aiming of directional mass-focused warheads vs. surface & air targets
- Design, simulate, fabricate, and test an imaging fuze to enable warhead aimpoint selection for air-delivered munitions.

65313-1641

# Distributed Miniature Initiation Technology

Munitions Directorate

- Enable focused warheads in smaller, adaptable ordnance packages to effectively counter targets with reduced collateral damage

**MASS FOCUSED/DIRECTIONAL  
WARHEAD(S)**

## Initiation Needed For Aimable Warheads:

- Individual control of initiation points
- Low firing energy detonators
- Miniature firing systems
- Initiation of various high explosives

## Aimable Warheads Attributes:

- Smaller
- Higher  $P_k$
- Lower potential for collateral damage

# Adaptable Miniature Initiation System Technology (AF & DOE Kansas City Plant)

Munitions Directorate

## AMIST Architecture II: Autonomous Initiation Points

### Initiation Point Components

EFI Detonator  
CDU  
Trigger Circuit  
Voltage Step up  
Power Supply  
Memory  
Logic  
Clock

### Advantages

Low voltage routed in main charge  
Wire routing doesn't limit mode selection  
Submunition application  
Minimal amount of wiring

### Disadvantages

Maximum quantity of components in fill  
Maximum complexity

# Fuzing For High Speed Penetrator

Munitions Directorate

11\_T107114. ppt

**High Speed Penetrator  
Ordnance Package**

**STRIFE Fuzing**

- Advanced Development
- Contractor: ATK/Thales

**Changes Implemented  
To MEHTF for Tactical  
Baseline Point  
Design Fuze**

# Fuze Integrated Bomb Damage Information Demonstration Demonstration vs CONOPS

Munitions Directorate

## Technology Demonstration

## Projected CONOPS

- **Advanced Development**
- **Contractor: General Dynamics**
- **EGBU-27 & GBU-33 (BLU-109) Demos**

# Air Force BLU-97 Fuze Effort

Munitions Directorate

## UXO:

- Danger to Friendly Forces and Civilian Population
- Danger to Potential IED's - Improvised Explosive Devices

## Deliverables:

- Detailed Drawings of fully integrated Self-Destruct design
- Demonstration Prototype
- Final Report detailing tests results and summary of effort
- Business Implementation Plan for Retrofitting CBU-87

## Activity:

Release AFRL/MN BAA, March 05

Proposals due, April 22

Award Contract, Mid May

# Hardened Miniature Fuze Technology

Munitions Directorate

Packaging

MEMS/NEMS Sensors

## Objective:

- Develop Hardened Miniaturized Fuzing Technology that Can Perform Active Target Detection and Initiation Functions for Novel Weapon Concepts

## Deliverables:

- Detailed Drawings of Miniature Fuze design
- Demonstration Prototype
- Final Report detailing tests results and summary of effort

## Activity:

- Release AFRL/MN BAA, Jun 05
- Proposals due, Aug
- Award Contract, Sep

# Long Term Fuze Vision

*Munitions Directorate*

- Watch makers Paradigm
  - Mechanical – Electro Mechanical - Electronic
- Fuzing Technology
  - IM compatibility
  - UAV Weaponization
  - Urban Terrain
  - High Degree of Weapon Integration
  - Network Centric Data Infusion

# Conclusion

*Munitions Directorate*

- **Understanding AFRL's Role in Fuzing**
- **Continue to Investing in Science and Technology**
  - Explore innovative funding options
- **Dialog strategies with User and Industry**
  - “Early and Often”
- **Visualize Long Term Fuze Requirements**
