

DES Demilitarization Crushers and Services High Capacity, Specialized, Cryogenic

DES Group LLC (Demilitarization Equipment Services) provides a wide range of equipment and services to the demilitarization industry. The DES Crusher is a trailer mounted, transportable, high capacity system with optional cryogenic cooling capability. The system is computer controlled to provide considerable flexibility in operation and low cost production.

The presentation will show the Crusher in operation, the effect and costs of cryogenic cooling and give guidance for effective use of cryogenic cooling when required for the specific ordnance to be processed. The presentation will also describe other versions of the Crusher which can be made available such as smaller size, equipment for specialized application and more specialized lower capacity units. The use of fixtures and adapters to enhance the use of the system will be described. DES has established an extensive network of working relationships with other demilitarization firms such as well known Eldorado Engineering to provide complete, flexible and cost effective demilitarization solutions.
