B-52 Aircrew Training Devices

Projected Program

OGDEN AIR LOGISTICS CENTER

Description	
<ul style="list-style-type: none"> The contractor will provide Contract Logistic Support (CLS) for the B-52 Weapon System Trainer (WST), T4 Electronic Warfare Simulator (EWS), Cockpit Procedure Trainer (CPT) and Offensive Station Mission Trainer (OSMT). The contractor will support the operational requirements of the Training Systems Support Center (TSSC) and develop, procure, manufacture, assemble, package, ship and install all modifications to the Air Crew Training Devices (ATDs) throughout the term of the contract. It is anticipated that during the contracted period that the B-52 WST will require a computer rehost. The B-52 is undergoing a major communication modification, Combat Network Communications Technology (CONNECT). Phase I is expected to be completed by the end of the existing contract. Phase II will be required to be part of the overall competition of this program.

E-3 AWACS Maintenance Training Sys

Current Program

OGDEN AIR LOGISTICS CENTER

Summary of Program Requirements

- The E-3 AWACS Maintenance Training System (MTS) is the primary source of training for the E-3 AWACS maintenance personnel at Tinker AFG, OK. The E-3 MTS program provides hands-on training in organizational on and off equipment maintenance procedures by simulating the operation of hardware and software used on the aircraft. The contractor is responsible for providing CLS for the Surveillance Radar Training System (SRTS), the Procedures Maintenance Trainer (PMT), Familiarization Maintenance Trainer (FMT), the Data Processor/Display Maintenance Simulator Set (DP/DMSS), the Training System Support Center (TSSC), and the Simulator Interface Management Courseware Development System. The contractor maintains the technical data baseline, the spares package, and provides modifications and engineering support. The contractor also provides Contractor Support (CS) for ten individually unique Mobile Training Sets.

C-130 Aircrew Training System

Current Program

OGDEN AIR LOGISTICS CENTER

Summary of Program Requirements

- Provide a training program which results in highly trained aircrews and maintenance personnel for C-130 weapon system operations.
- Provide Guaranteed Student Throughput with on time graduation and meet projected throughput/availability requirements to meet Air Force standards and pass an Air Force administered test. This includes provisions for variations in quantity of students and content of training.
- Effective management of the overall Aircrew Training System (ATS), including ongoing efforts, problem identification and resolution, special projects, reporting and communication, startup transition, security and safety.
- Maintain ATS concurrency with the weapon system program. This includes the capability to incorporate highly technical modifications into the aircrew training devices and the ability to modify/upgrade training devices/courseware/software prior to the aircraft upgrades.
- Effectively manage and operate the Training System Support Centers (TSSC) at Little Rock AFB and Dobbins ARB, to include the appropriate manning levels to complete Design Requests (DRs) in a timely manner.
- Provide a Quality Assurance (QA) program that is equivalent to ISO 9001, and promotes continuous improvements in the ATS. The QA program should also be independent from the work or production organization, and insure contract compliance.
