Integrated Defense Systems

Secure Border Initiative (SBI) and SBI^{net}

The Secure Border Initiative (SBI) is a comprehensive plan by the U.S. Department of Homeland Security (DHS) to gain operational control of the U.S. borders through the integration of increased staffing, interior enforcement, detection technology and infrastructure, and coordination on federal, state, local and international levels.

A critical component of SBI is SBI^{net}, a program focused on transforming border control through technology and infrastructure. SBI^{net} will provide frontline personnel advantages in securing the nation's land borders through the most effective integration of current and next generation technology, infrastructure, staffing and response platforms.

The SBI^{net} solution will be managed and executed by the U.S. Customs and Border Protection agency, and will be deployed using a homeland security threat-based approach.

SBI^{net} Program Bid Opportunities

- ▶ [Toolbox Bid Opportunities](#)

Bid Opportunity Announcements targeted toward small businesses:

- Regulatory & Land Mgt. (Closed 10/20)
- Engineering Services (Closed 01/12)
- Tool Box (Closed 06/07)
- Maintenance (upcoming)

2007 Opportunities Targeted for Small Business

- Warehousing
- Maintenance
- Tactical Infrastructure Installation
- Transportation
- COT's Equipment
- Sensor Technology
- Consumables
- Program Management
- Training
- Buy/Lease Trucks
- Modify Vehicles
- Architecture & Engineering
